

LASER-LIGHT AND INTERACTIONS WITH PARTICLES (LIP2020)
WARSAW, POLAND, ON AUGUST 23-28, 2020

Dear colleagues

This is the 1st announcement of the 13th international conference on **Laser-light and Interactions with Particles (LIP2020)** to be held in **Warsaw, Poland, on August 23-28, 2020**.

The **call for abstracts** will be opened on **November 1, 2019** for **subjects dealing with**: nearfield, far-field and time-resolved electro-magnetic scattering; plasmonics and other resonances; complex shaped particles and aggregates; laser, acoustical and quantum beams description; multiple scattering random media, optical particle sizing and characterization methods; mechanical effects of light... The following **application areas** will be welcomed: multi-phase flow characterization; remote sensing for aerosol science and environment; plasma and soft matter physics; optical tweezers and particle manipulation; micro rheology and biomedical optical engineering...

Get a look to the conference web site, the flyer, and spread the information around!
Conference website: <http://lip-conference.org/>

Cheers

Daniel Jakubczyk*, **Maciej Kolwas***, **Fabrice Onofri** & **Gérard Gouesbet**
Conveners (and Chairs) of LIP2020 conference*

Mariusz Wozniak, **Anastasiya Derkachova**

Conference secretary
